SUMMARY

Computer Science and Engineering student with knowledge of Python, Java, HTML, CSS, JavaScript, and SQL. Experienced in building basic web applications and Java-based projects through internships and academic work. Quick learner with good problem-solving, communication, and teamwork skills. Looking for an entry-level Software Development role.

EDUCATION

CMR University	2022 - 2026
B.Tech in Computer Science and Engineering (CGPA: 9.07)	
Sir M.V. PU College	2022
Pre-University Course (Percentage: 75%)	
Jnana Bodhini School	2020
Secondary School Leaving Certificate (Percentage: 97.6%)	

EXPERIENCE (Internships)

- Axcentra (AICTE)** Feb 2026 - Mar 2026
Completed a 4-week internship focused on Java and OOP concepts. Developed console-based applications including Bank, Library, Employee, ATM, and Hotel Management systems. Gained experience in file handling, collections, and system design.
- Front End Web Development Intern at Edunet Foundation (AICTE & IBM Skills Build)** Aug 2025 – Sep 2025
Completed a 6-week structured internship focused on front-end development concepts and industry-oriented practices. Applied UI development principles through guided training modules and practical tasks. Demonstrated active participation and consistent engagement throughout the program.

PROJECTS

- AI – Powered Crop Health Monitoring** Oct 2025 – May 2026
 - Built a Stream lit web application that allows users to upload crop leaf images for disease prediction and integrated a deep learning model to identify crop diseases and display prediction results.
 - Tech Stack: Python, Stream lit, Keras, OpenCV, HTML, CSS, MobileNetV2.
- Personal Portfolio Website** Sep 2025
 - Designed and developed a responsive portfolio website using HTML, CSS, and JavaScript with Displays education, internships, projects, technical skills, certifications, and contact information in a professional format.
 - Tech Stack: HTML, CSS, JavaScript, and Git + GitHub.

CERTIFICATIONS

- Oracle Certified Foundations Associate – AI foundations** (Oracle University) Aug 2025
Gained foundational knowledge of artificial intelligence concepts, machine learning basics, and AI applications.
- Career Essentials in Software Development** (Microsoft and LinkedIn) Mar 2025
Obtained foundational knowledge in Software Development Lifecycle, Coding practices, and Skills for tech roles.
- Data Mining and Machine Learning** (Udemy) Sep 2024
Learned key concepts in Data Mining, Supervised Learning, and Model Evaluation using real-world datasets.

SKILLS & ABLITIES

Technical Skills

Python, C (Basic)
DBMS, SQL

Soft Skills

Effective Communication
Fast Learner & Active Listening
Time Management & Collaboration
Adaptability & Teamwork

Languages

English
Kannada
Telugu
Hindi (Basic)
